***Re: CC Docket No. 94-102 / Third Quarterly TTY Implementation Report
Broadband PCS Stations KNLH232, KNLH234
BTA299 D - Minot, ND
BTA299 F - Minot, ND***

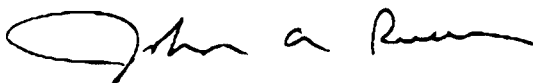

Dear Ms. Salas:

North Dakota Network Co. ("NDNC") hereby submits its third quarterly report on implementation of TTY access to 9-1-1 over its digital wireless network, pursuant to the Commission's *Fourth Report and Order* in CC Docket No. 94-102, released December 14, 2000.

NDNC has launched its service on the Minot F-Block and plans to launch service soon on the Minot D-Block. We are using Nortel CDMA base stations and switching equipment in our network, and we are dependent on Nortel for the provision and installation (on a turnkey basis) of the equipment and/or software necessary to allow our digital wireless network to process E911 calls originating from Text Telephone ("TTY") devices. We understand that Nortel will be providing additional information about TTY compatibility of their CDMA equipment in their quarterly update filing through the TTY Forum. Therefore, we hereby join in Nortel's submission to the FCC through the TTY Forum's quarterly report.

NDNC is a small carrier serving a rural area, and lacks any influence over the research and development activities of its equipment vendors. We will make every effort to implement TTY capability in our network by the June 30, 2002 deadline.

Respectfully Submitted,

John A. Reiser
Chief Operations Officer
North Dakota Network Co.
